### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the main reason for the allowance of claim 1 is that the prior art fails to disclose an offset coupler including a clamp member, wherein the clamp member has first and second portions, a means for drawing the first and second portions together round a portion of the kingpin to clamp the clamp member thereto, and adjustable means for urging the first plate member against the skid. The main reason for the allowance of claim 10 is that the prior art fails to disclose the means for coupling the device to the trailer, and wherein the means for coupling the device to the trailer includes a plurality of vertical bores through the first plate member and a plurality of bolts there through for bolting the first plate member to the skid plate. The main reason for the allowance of claim 12 is that the prior art fails to disclose the limitation that that the means for coupling the device to the trailer includes a recess in the upper surface of the first plate adjacent the opening. The main reason for the allowance of claims 13 and 16 is that the prior art fails to disclose the adjustable means for urging the first plate member away from the clamp member, wherein at least a portion of the adjustable means for urging extends between the clamp member and the first plate member. The main reason for the allowance of claim 23 is that the prior art fails to disclose the recited method including inter alia receiving the kingpin of the trailer in the opening of the offset coupler; coupling the offset coupler with the trailer; and receiving the kingpin of the offset coupler in the fifth wheel hitch of the tow vehicle.
